John: Wes Hayward describes filter design using the x.exe program in an article in the June 1995 issue of QEX. The article indicates that this program is available as part of the software package that comes with the ARRL publication "Intro to RF Design". January 95 QEX has an article by Jacob Makhinson, N6NWP, on his experiences with the programs in this package. Both articles are reprinted in the ARRL's recent book, "QRP Power". Good luck!

**Subject: Nichrome wire**

Hi gang,

The parasitic suppressor that I'm making calls for 18 gauge nichrome-60 wire. I called all over Phoenix and looked in ALL my catalogs...Mouser doesn't even have it! wheew I had no idea this would be such a challenge. Anyone have a couple feet of 18 gauge nichrome-60 wire that you could part with?

Best regards,

Jack W7QQQ

**Subject:** selectobject pot

Thanks gang for all the good info.  
Replacred 5 meg pot with a dual 2.5  
meg one and now it works much better.  
2.5 megs seems to be the most  
agreed upon size and as I had one  
around that is what I used.  
Again thanks for all the good dope.

**Subject:** Another St. Louis MO Haunt

On the last trip to St. Louis, I had time to visit another good BA/Military

place. It was called

The Electronics Exchange Inc.  
8644 St. Charles Rock Road  
St. Louis, MO 63114  
www.electronics-exchange.com/  
314-426-3056, fax 314-426-4848

The have very little in the way of complete radios etc. but they do have a large supply of components. They had lots of tubes, mostly 6 and 12 volt types, but didn't see any special types or military types. They had lots of connectors, fuse holders, ICs, computer parts, terminal boards and some of the largest powerstats I have ever seen. These powerstats had steering wheels for adjustment knobs and must have weighed 100s of pounds each. They also have power supplies, caps, resistors and probably a lot more I didn't get to see due to my short time there. The two gentlemen in the store were of little help and one was pretty hard to talk to, but it was the end of the day and maybe they were tired. I will definitely add this store to my stops in St. Louis.

Good BA hunting and 73s,

**Subject:** Just got my ham radio page together...

Hello all,

Sorry for the 'group broadcast', but I just wanted to put the word out I got my first ham radio page together, with lots of pix of Drake, Collins, Heath, and other such rigs of the past.

Take a look, and let me know what you think. I apologize for any blatant errors - it's a 'work in progress'.

Also, I list an email address of 'dx40@juno.com'. I did this as a spam dodge. Now the spambots will pick up my 'lesser' email address, and keep this one free of garbage (I post to newsgroups with the Juno address as well). So if you want, you can just reply to my 'normal' email address of nyet@ix.netcom.com.

Thanks to all and 73,

Dave WB7AWK  
Tacoma, WA
